PROFESSIONAL SUMMARY

Muhammad Rizwan is a Founder, Educationist and Digital Architect focused on building practical digital products across education, web technology and emerging AI experiences. As the founder of Education Point, he works on developing student-focused digital platforms and technology-driven learning experiences. His portfolio includes education platforms, AI experiments, PWAs and social digital products. Open to international opportunities, remote roles, and technology collaborations.

CORE SKILLS & TECHNICAL COMPETENCIES

- **Digital Product Development:** Product Concept Development, Web Platform Development, Digital Project Architecture, Feature Planning, User-focused Product Design
- **Web Technologies:** HTML, CSS, JavaScript, Responsive Web Design, Progressive Web Apps (PWA), REST API Integration
- **Platforms & Tools:** Supabase, GitHub, Netlify, Google Drive Integrations, REST APIs, AI / OpenRouter APIs
- **AI & Emerging Technology:** AI-powered web applications, AI API integration, AI product experimentation, Prompt engineering, AI-assisted development

FOUNDER EXPERIENCE & INDEPENDENT PROJECTS

- Founder & Owner — Education Point** 2024 – Present | Mianwali, Pakistan / Remote
- Spearheaded the conceptualization, architecture, and deployment of Education Point (educationpoint360.netlify.app), a dedicated academic portal built for students preparing for Matric, Intermediate, and competitive Entry Tests.
 - Organized and deployed curriculum resources across 10+ key categories: Notes, MCQs, Past Papers, Guess Papers, Pairing Schemes, Test Series, and Preparation Material.
 - Designed responsive web interfaces prioritized for fast loading on mobile and desktop devices across varied network bandwidths.
 - Engineered accompanying digital products including Education Point AI (intelligent study assistant) and Education Point Courses to broaden educational accessibility.

SELECTED FEATURED PROJECTS

- Education Point** (Education Technology (EdTech)) — <https://educationpoint360.netlify.app/>
An education platform focused on providing students with structured academic resources, notes, preparation material, MCQs, past papers, pairing schemes, tests and other learning resources.
- Education Point AI** (AI / Education Technology) — <https://edupointai.netlify.app/>
An AI-focused educational product designed to explore intelligent assistance and student-focused digital learning experiences.
